

Providing clients with security solutions since 2000.

ASSESS

IT SECURITY ASSESSMENT

Redhawk provides independent review for compliance with GLBA, HIPAA and PCI. The Redhawk Information Security Online Portal streamlines reports and response capabilities for clients with a cloud based solution.

- Standard process for consistent testing and re-testing
- Online collaboration with Redhawk consultants
- Recommendations to improve security posture
- Audit style summary report for Management
- Archived reports for year-to-year comparison

VULNERABILITY SCANS / PENETRATION TESTS

Redhawk's process uses login and authentication to test for compliance against a predefined policy. Penetration testing is combined with scanning for a thorough assessment. Scanning services include:

- External Penetration Testing
- Internal Vulnerability Scanning
- PCI Compliant ASV Scanning
- Application Penetration Testing

PROTECT

REMEDIATE VULNERABILITIES

- Security Consulting - hands-on services
- Email Security, Encryption, Archiving
- Firewall, IPS, Content Filtering
- Log Monitoring and Reporting
- Backup and Archiving solutions

MANAGE

FULL SERVICE MSSP

Redhawk provides full-service security services with maintenance, documentation, change control, log review, incident response and reports.

- Managed Email Encryption, Archiving and Security
- Security Event Management (SEM)
- Firewall
- Intrusion Prevention Systems (IPS)
